PROFESSIONAL EXPERIENCE

Procter & Gamble **July 2024 - July 2026**
Security Engineer *Cincinnati, OH, USA*

- Hardened AWS through infrastructure as code by enforcing IAM access-key rotation and requiring EC2 instances to use IMDSv2.
- Validated KMS, RDS, and multi-AZ configuration.
- Drove the annual ISO/IEC 27001:2022 internal audit across all 127 controls (every clause plus four Annex A domains) to zero nonconformities.
- Run SOC 2 Type II and ISO 27001 evidence operations, remediating and re-evidencing 30-plus controls across authentication, access reviews, AWS configuration, logging, and vulnerability scanning.
- Built incident-response processes (alert ingestion, runbooks, on-call, SLO alerts) and contained a spam organization that generated roughly 9,000 invites by correlating IPs from logs into the blocklist.
- Brought AI into the workflow: migrated an internal security assistant from ChatGPT to Claude, built an LLM-powered Slack assistant on read-only OneTrust for natural-language compliance queries, and evaluated 11 AI code-review tools.
- Completed third-party risk reviews, assessed 35-plus vendors' AI usage and policies, and answered security questionnaires (including HECVAT) for enterprise customers.

Cloverleaf.me **May 2023 - July 2024**
Infosec & Devops Intern *Cincinnati, OH, USA*

- Operationalized security monitoring in Datadog.
- Built Slack notification workflows and structured tracking for vulnerabilities and bug bounty items.
- Deployed weekly OWASP ZAP baseline scans on production, surfacing ~3-5 findings per scan and routing results into remediation tracking.
- Owned the company's bug bounty program (200+ submissions); reduced end-to-end turnaround from weeks (~1 month) to <= 1 week through automation and structured triage.
- Built a self-service SSO escalation workflow with automatic revocation checks every 15 minutes; used weekly for just-in-time privileged access while reinforcing least-privilege behavior.
- Automated weekly vulnerability scan uploads to Drata to support SOC 2 Type II / ISO 27001 evidence continuity.

CERTIFICATIONS, SKILLS & INTERESTS

Skills: AWS, Infrastructure as Code (IaC), Datadog, Docker, Git, Gitlab, GitHub Actions, Linux/Unix, Role-based Access Control, TCP/IP

Certifications: CompTIA Security+, AI Ready Ohio Certificate, Python/SQL Career Accelerator, Google Cybersecurity Professional Certificate, OpenSSF Developing Secure Software Certificate

Interests: Automotive tinkering, Horror (all of it), Sewing & leatherwork, Barbering, Chicago sports (situationally), True crime & cold cases

EDUCATION

Indiana University - Bloomington **July 2017 - May 2021**
Bachelor's, Fashion Design *GPA: 3.8*
